

# Kedebideri - Character Set Support

*The Beria Erfe script has received [provisional codepoint assignments](#) by the Unicode Technical Committee. The script has not yet been formally accepted and approved for a future version of the Unicode Standard. The Kedebideri font is using the provisional codepoints, but those codepoints can always change. Should those codepoints change, this font would be re-released with the new encoding. Documents would then need converting to use the new codepoints.*

The Kedebideri font supports the characters in the Beria Erfe block.

## Supported characters

The following character ranges are supported by this font:

Unicode block	Kedebideri support
Beria Erfe (16EA0..16EDF)	✓
Codepage 1252 (Western) <sup>1</sup>	✓

A selection of characters from the General Punctuation block, such as various-sized spaces, are also supported; a utility such as [SIL ViewGlyph](#) can be used to examine the exact repertoire of this font.

<sup>1</sup>Inclusion of basic Latin repertoire is provided as a convenience, e.g., for use in menus or for displaying markup in text files; these fonts are not intended for extensive Latin script use.
